

FRONT END DEVELOPMENT FRAMEWORKS AND UI ENGINEERING (25CS1201E)

2025-26, Term-III

Project Problem Statement Submission Form

Sec No-5	Team No-	Project Title- Flight Search and Booking Engine
Team Lead Roll Number		2520030492
Team Lead Name		A.Priya
Team Member Roll Number		2520030491
Team Member Name		Sreehaasini.k

1. Abstract

(Summarize the project idea, problem background, and proposed solution. Not more than 250 words.)

The growing demand for online airline reservation systems has increased the need for efficient and user-friendly flight booking platforms. Traditional booking systems often provide limited customization, outdated interfaces, and complex booking procedures, making it difficult for users to search, compare, and book flights quickly. Travelers often face challenges such as comparing ticket prices across airlines, managing travel schedules, selecting suitable routes, and accessing accurate flight information in one place. These issues can lead to confusion, increased booking time, and poor user experience. To overcome these challenges, there is a need for a modern and centralized flight booking system that provides faster search results, better filtering options, secure booking features, and a smooth user-friendly interface for travelers.

2. Module Mapping

(Provide details of how modules are divided among team members.)

Module Name	Assigned Roll Number(s)	Signature
Frontend UI Design (Home, Search & Booking Pages)	2520030491	Sreehaasini.k
Backend Development (Server, APIs & Database)	2520030492	APriya
Flight Search, Filters & Payment Module	2520030491	Sreehaasini.k
Documentation, Integration & Testing	2520030492	Priya

3. Module Details

(Explain the responsibility of each student concerning their assigned module.)

2520030491 – Frontend UI Design: Responsible for designing and developing the user interface of the application using React.js, including Home page, Flight Search page, Booking page, and Summary page. Ensures responsive design and better user experience.

2520030492 – Backend Development: Responsible for developing backend services using Node.js and Express.js. Handles server setup, REST APIs, routing, and database connectivity between frontend and backend.

2520030491 – Flight Search, Filters & Payment Module: Responsible for implementing flight search functionality, sorting and filtering options, seat selection, payment gateway mock integration, and booking confirmation process.

2520030492 – Documentation, Integration & Testing: Responsible for preparing project documentation, abstract, PPT, integrating all modules, testing functionality, and final project presentation.

4. Frameworks / Platforms / Software Used

(List the frameworks, libraries, platforms, or tools you plan to use.)

- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- Node.js
- Express.js
- Visual Studio Code
- npm
- REST APIs
- Postman
- MySQL
- GitHub
- Browser for Testing
